WORK EXPERIENCE

AI & Data Analyst Intern, AMAST Sdn. Bhd.

Feb 2026 – Aug 2026 (Expected)

- Developed **AMAST CRM**, an AI-enabled CRM platform integrating contacts, accounts, email sync, enrichment, and interactive pipeline management into a unified sales workflow.
- Built a Qwen- and Apollo-powered lead generation pipeline that automated research for 1,000+ leads and improved match accuracy by 40% through fuzzy matching and scoring.
- Unified AI lead generation, LLM-based enrichment, Google account feature sync, and interactive CRM board into a connected workflow, simplifying pipeline management and reducing manual entry by 70%.
- Architected **Alumni Search System for UTM**, a multi-agent system to aggregate alumni data from LinkedIn, social media, news sources, and company website improving accuracy by 4x through LLM-based verification and scoring.

NOTABLE PROJECT

Forecasting Ethnic Composition Using Time-Series and Geopolitical NLP to Support Policy Planning (Thesis)

- Developed a demographic forecasting system using Python (pandas, NumPy, scikit-learn, XGBoost), integrating 25+ years of ethnic, migration, and geopolitical time-series data across 3 countries and 10+ ethnic groups.
- Engineered a machine-learning pipeline combining demographic trends with geopolitical NLP indicators to enable scenario-based sensitivity analysis for policy planning.
- Deployed an interactive Streamlit/Plotly dashboard for 2025–2035 forecasting and scenario impact analysis, reducing manual evaluation time by ~65%.
- **Best Computer Science Award:** Winning 1st place among 70+ projects.

ORGANIZATIONAL EXPERIENCE

Co-Lead, Google Developer Groups on Campus UPM

Oct 2024 – Oct 2025

- Led a team of 40+ members to organize 9 technical events on AI, cybersecurity, and web development, engaging a total of over 300 participants.
- Directed Build with AI UPM, achieving the highest attendance in GDG UPM history, surpassing previous records by over 100%.
- Supervised and mentored event committees for Exploring Web Security, PocketAI with Flutter, and Build it with Firebase, enhancing planning efficiency by 40%.

Member of Data and Information Bureau, PPI Malaysia

Jan 2024 - Jan 2025

- Conducted data collection on 200+ Indonesian students studying in Malaysia to support organizational planning and outreach.
- Analyzed data to identify potential event participants, improving engagement by over 40%.
- Designed a national scale survey, achieving a 95% response rate across multiple universities.

EDUCATION

Bachelor of Computer Science with Honours - 3.35 CGPA

Oct 2022 - Aug 2026 (Expected)

University Putra Malaysia

Courses: Advanced Programming, Data Mining, Database Security, Artificial Intelligence, etc.

Awards: 2x Dean's List Awardee, Best Computer Science Award (Final Year Project)

Certification: IBM Data Science Professional Certificate, Microsoft Data Visualization Professional Certificate, AWS Academy Graduate

SKILLS

- **Programming:** Python (Advanced), Java, SQL, HTML, CSS, R, JS
- **Machine Learning & AI:** Scikit-learn, TensorFlow, Time-Series Forecasting, NLP, XGBoost, Random Forest.
- **Data Engineering & Analytics:** Pandas, NumPy, Data Cleaning, Statistical Modeling, ETL Processes.
- **Visualization & Deployment:** Power BI, Streamlit, Plotly Dash, Matplotlib, Tableau.
- **MS Office Suite:** Microsoft Word, Excel, PowerPoint
- **Languages:** Indonesian (Native), English (IELTS 7.5), Malay
